under the Act of August 24, 1912  
Acceptance for mailing at special rate of postage provided for in Section 1103, Act of  
October 3, 1917, authorized on July 30, 1918

## OUR CONTRIBUTORS

Dr. Fairchild is professor of political economy at Yale University. He gathered data for the present article while acting as tax adviser to the Military Government of Santo Domingo during the winter of 1917-1918.

Mr. Zon is chief of the Division of Forest Investigations, U. S. Forest Service. He has made a world-wide study of forest resources, reports on which include "The Forest Resources of the World," *Forest Service, Bull.* 83, 1910. To the *Review* (October, 1916) he has contributed the article "South American Timber Resources and their relation to the World's Supply."

Vilhjalmur Stefansson is known for his repeated journeys in the Arctic and especially for his work as leader of the Canadian Arctic Expedition, 1913-1918. He has contributed several articles to the *Review* and is the author of an admirable book entitled "My Life with the Eskimo," 1913. His field work is characterized by an intimate knowledge of native living conditions and of the technique of Arctic travel.

Mr. Ward is professor of climatology at Harvard University and one of the foremost authorities on climate in this country. This and other of his recent contributions to the *Review* form part of a book on the climatology of the United States in the course of preparation.

Mr. McMahon, who writes from Australia, points out that the quantity of pearl and trochas-shell now being sent to America from the Torres Straits gives an additional interest to the little known islands described in his paper.
